bit 4/24/04
1. (Previously presented) A method, comprising:
- forming a sacrificial layer of material on a substrate;
  - covering said sacrificial layer of material with a polymer material;
  - removing said sacrificial layer to form a cantilevered polymer structure over a substrate using micromachining techniques;
  - forming at least one structure between said polymer structure and said substrate which avoids said polymer structure sticking to said substrate after said removing;
  - forming a plurality of leg portions, extending between an extending portion of said cantilevered polymer structure, and said substrate; and
  - an additional etching to free said leg portions from said substrate.

2 -3. (Canceled)
